

# Fonts

Sign your name or create beautiful sayings on your quilts. The font package built into your computer allows you to customize the lettering. Choose from a large range of font styles, and then customize each letter using Regular, Reg.Bold, Italic, It. Bold.

Open QCTv5 and select Pantograph.

Tap on Plugins at top right of screen.

Select Font Stitcher.

A window pops up with a keyboard. Begin typing in the space below the keyboard (red arrow). For upper case, touch Shift. To underline, touch abc in the font area. 

Change the font and the type of lettering in the box at lower right corner. Touch OK when finished. When asked to save your pattern, touch yes.

Note: You must save as a file. This will become a pattern just like any other quilting pattern.

Select a place to save your file, continuous line, block, etc., or select New and create your own folder. Name the file and touch Save.

Your lettering is now available for you to select and use just as you would any other block pattern.
